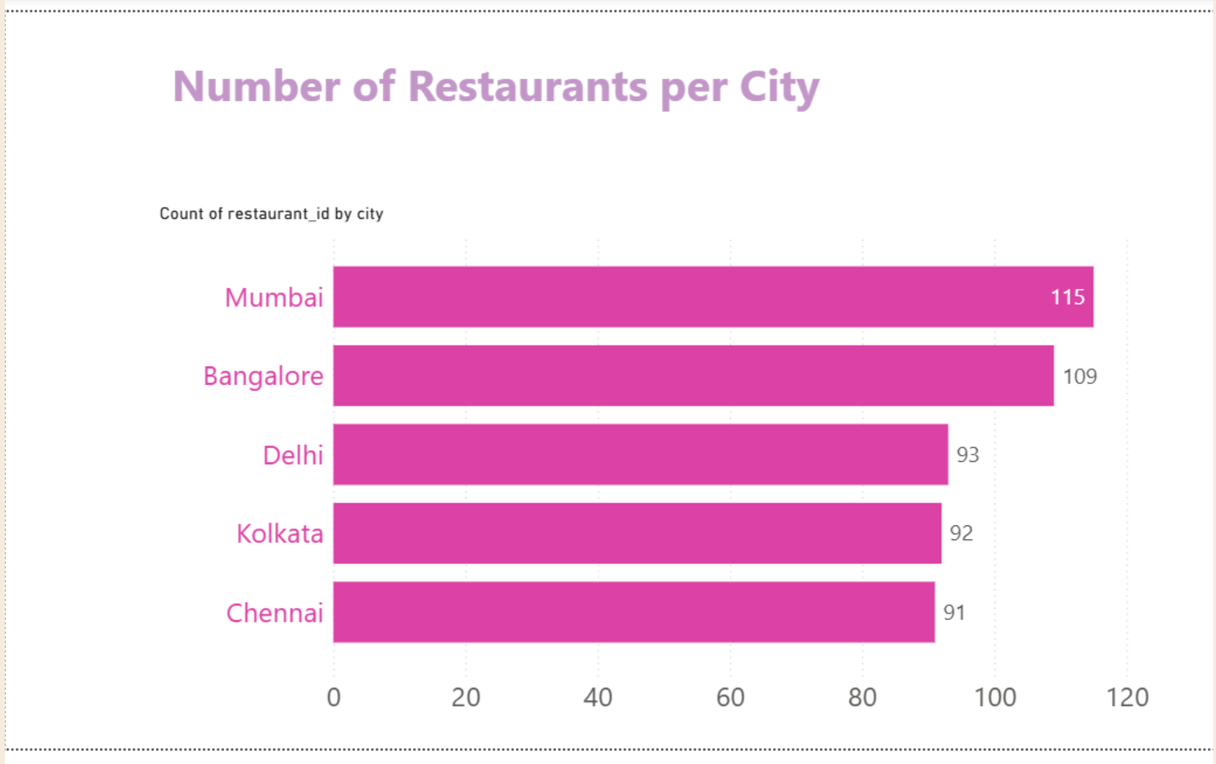
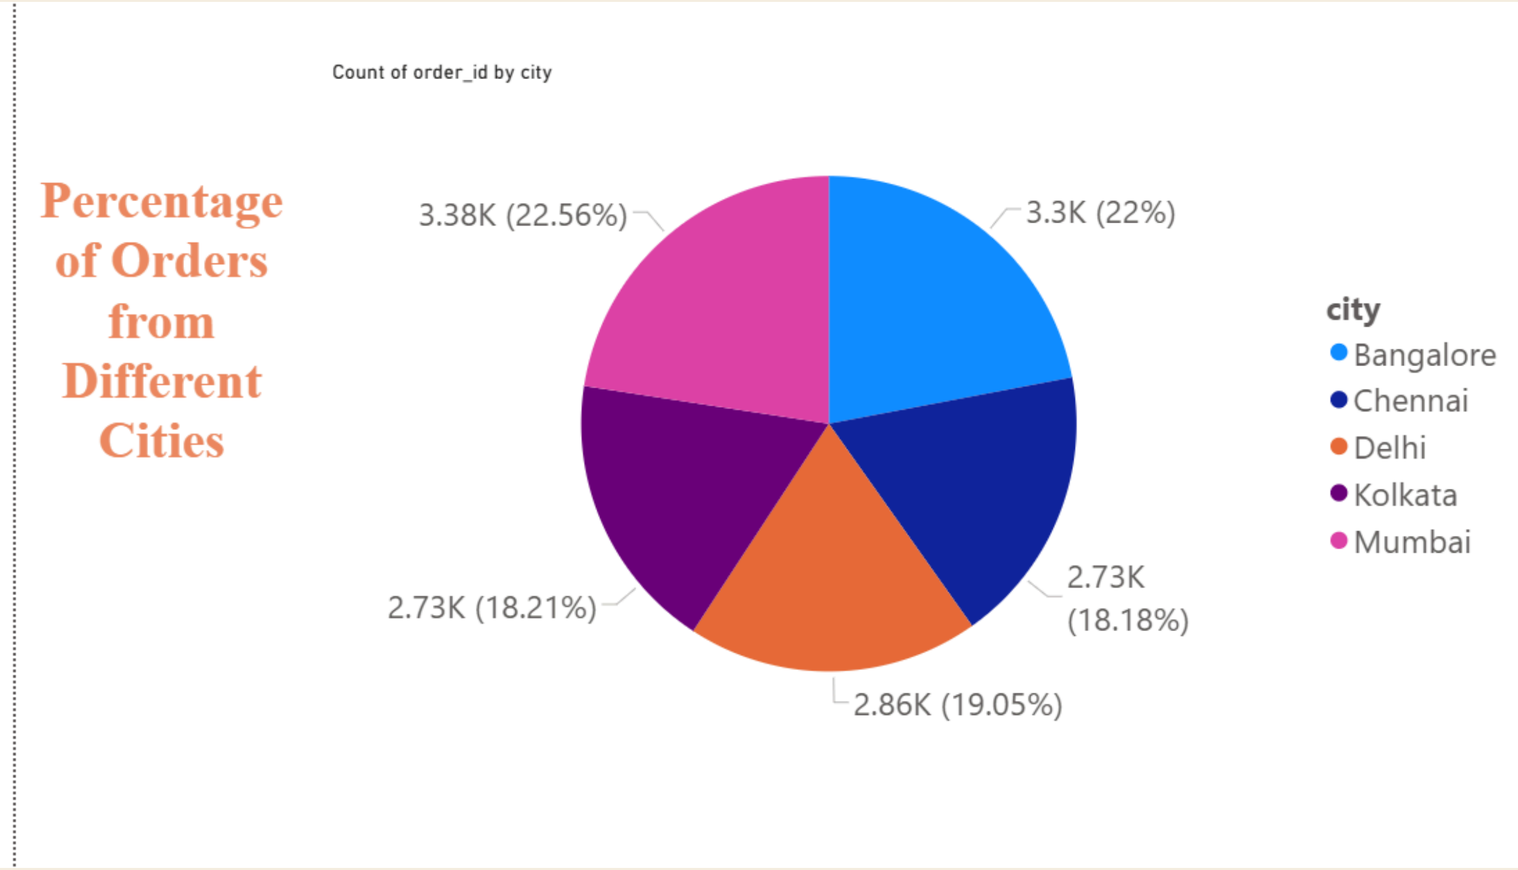
Number of Restaurants per City



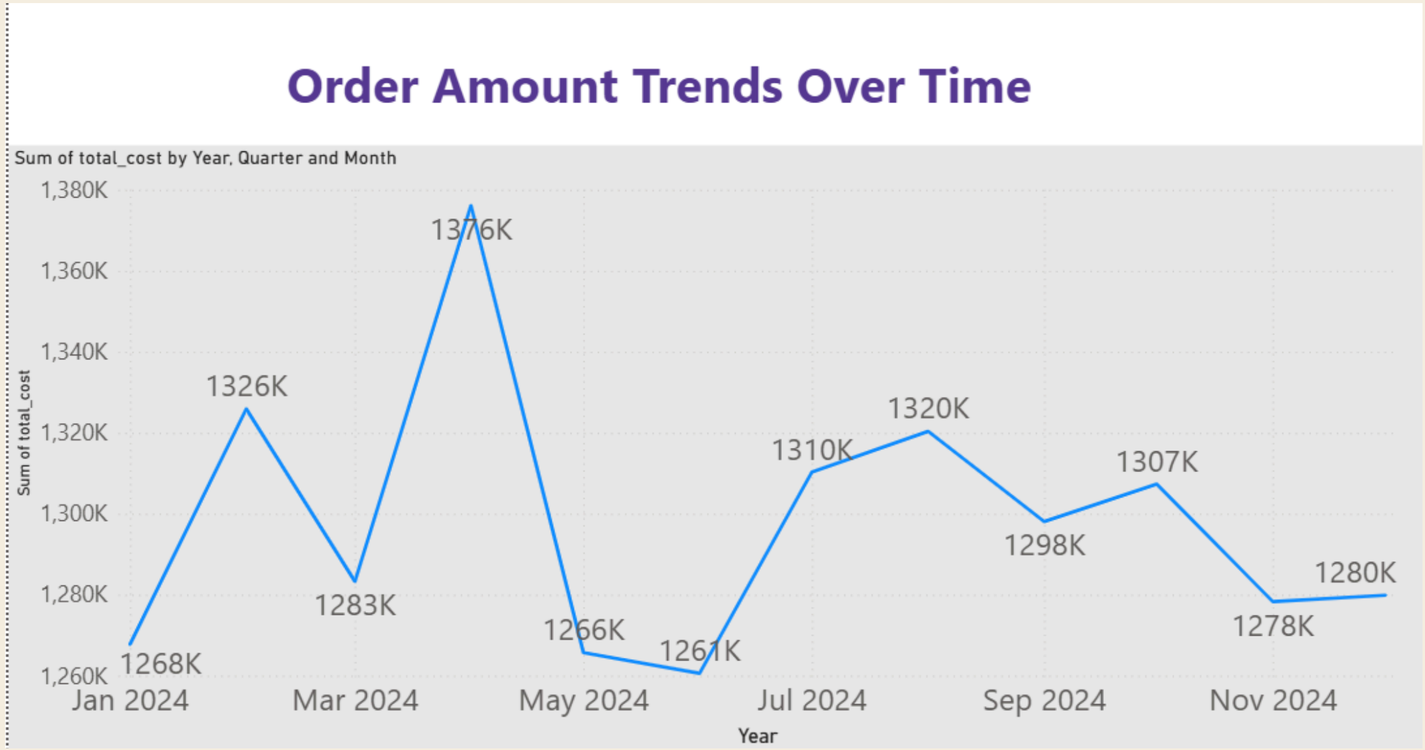
Mumbai has the highest restaurant presence with 100+ restaurants, making it the most competitive market on Zomato

Percentage of Orders from Different Cities



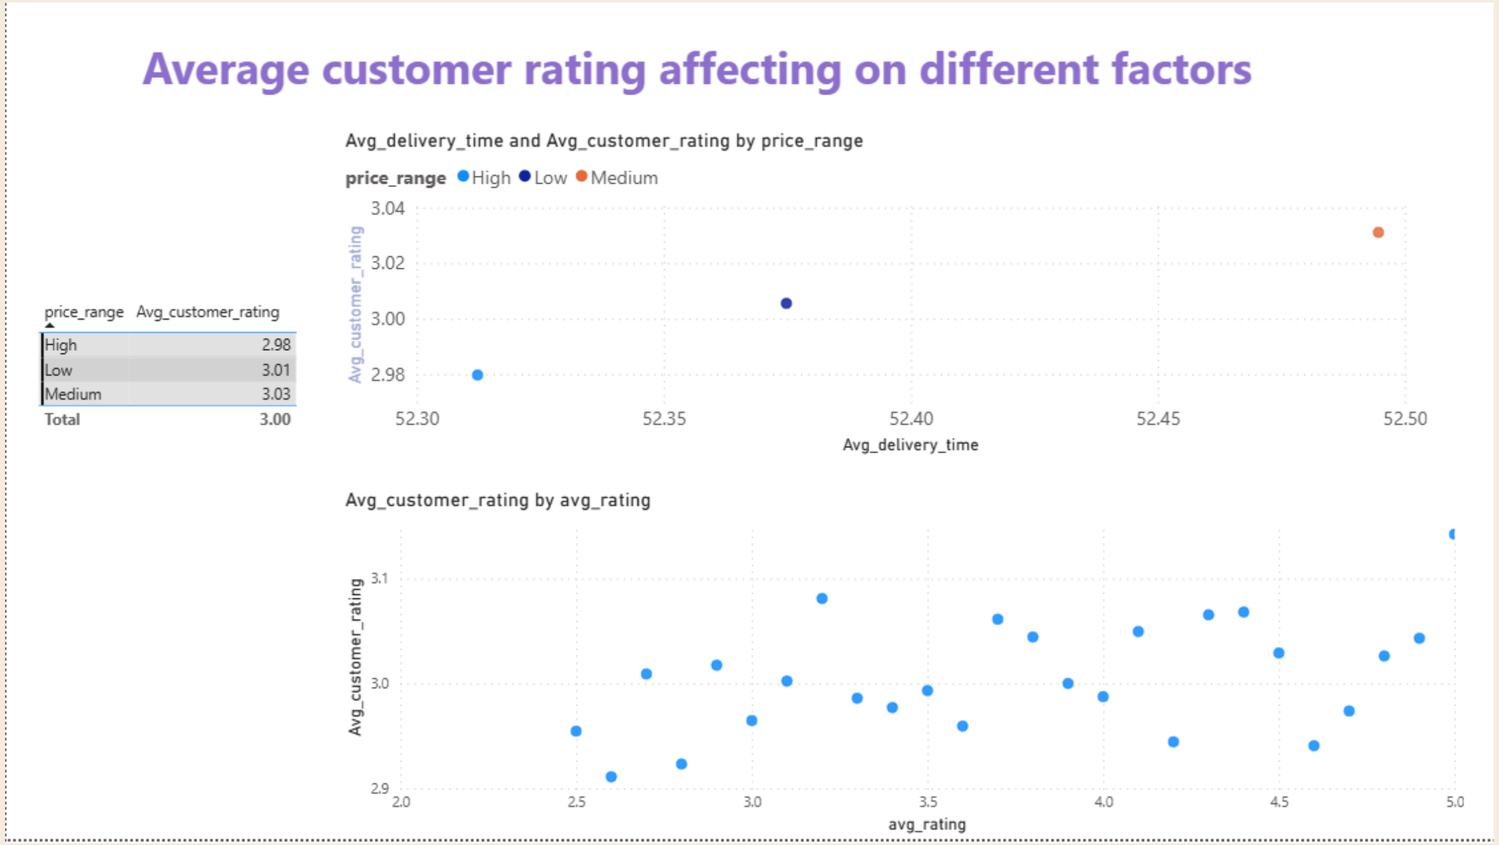
Mumbai leads with 22.56%, then Bangalore 22%, Delhi 19%, Kolkata 18.2% and Chennai 18.2%.

Order Amount Trends Over Time



Sales peaked in April, then dropped in May and June, and stayed steady after that

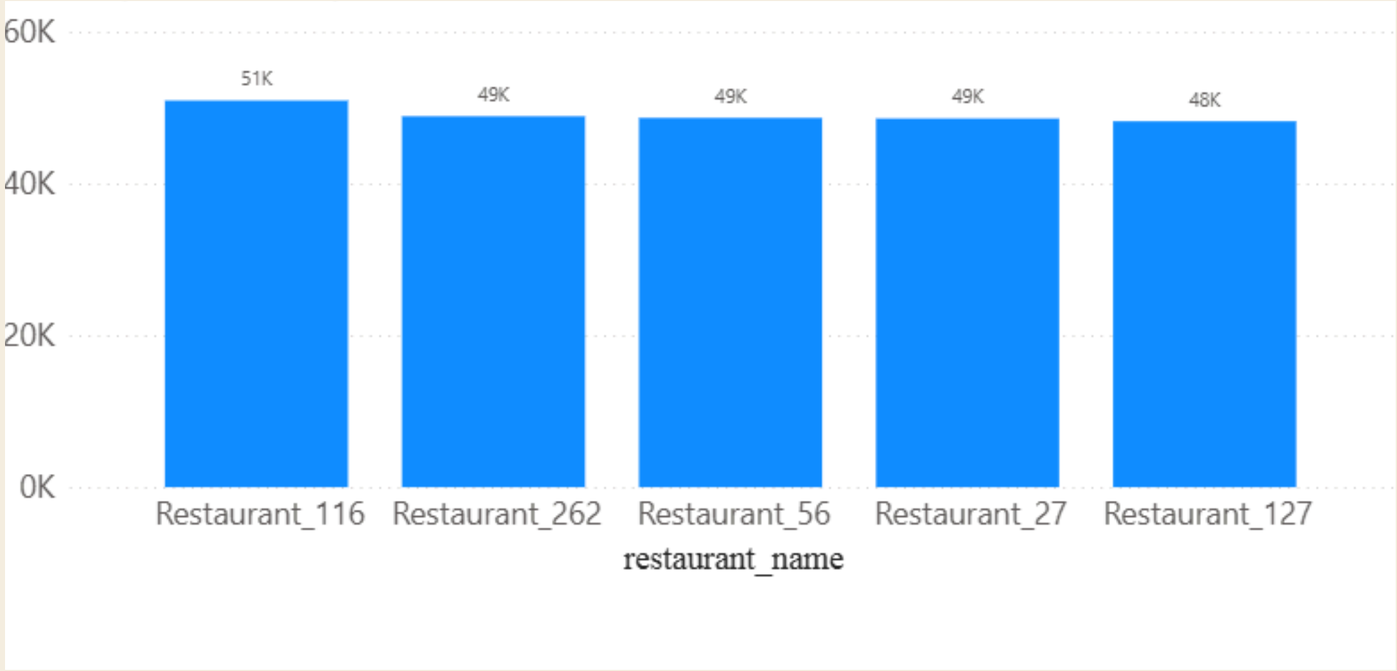
Correlation of Factors Affecting Average Rating



Delivery time between 52.30–52.50 minutes has minimal impact on customer rating

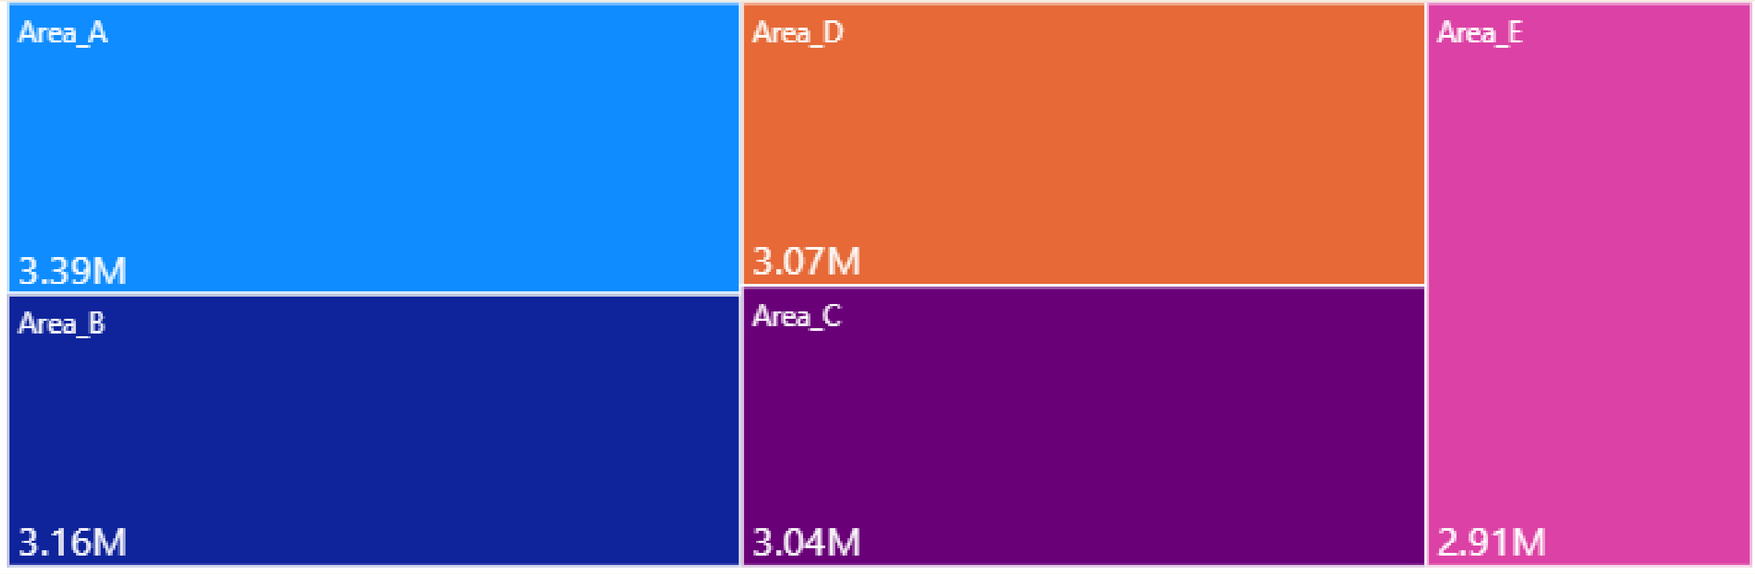
Price range does not positively correlate with customer satisfaction , Medium priced restaurants perform best

Top 5 Restaurants by Total Sales



Restaurant_116 is the highest earning restaurant with ~₹50K in total sales

Revenue by Area Using a Tree Map



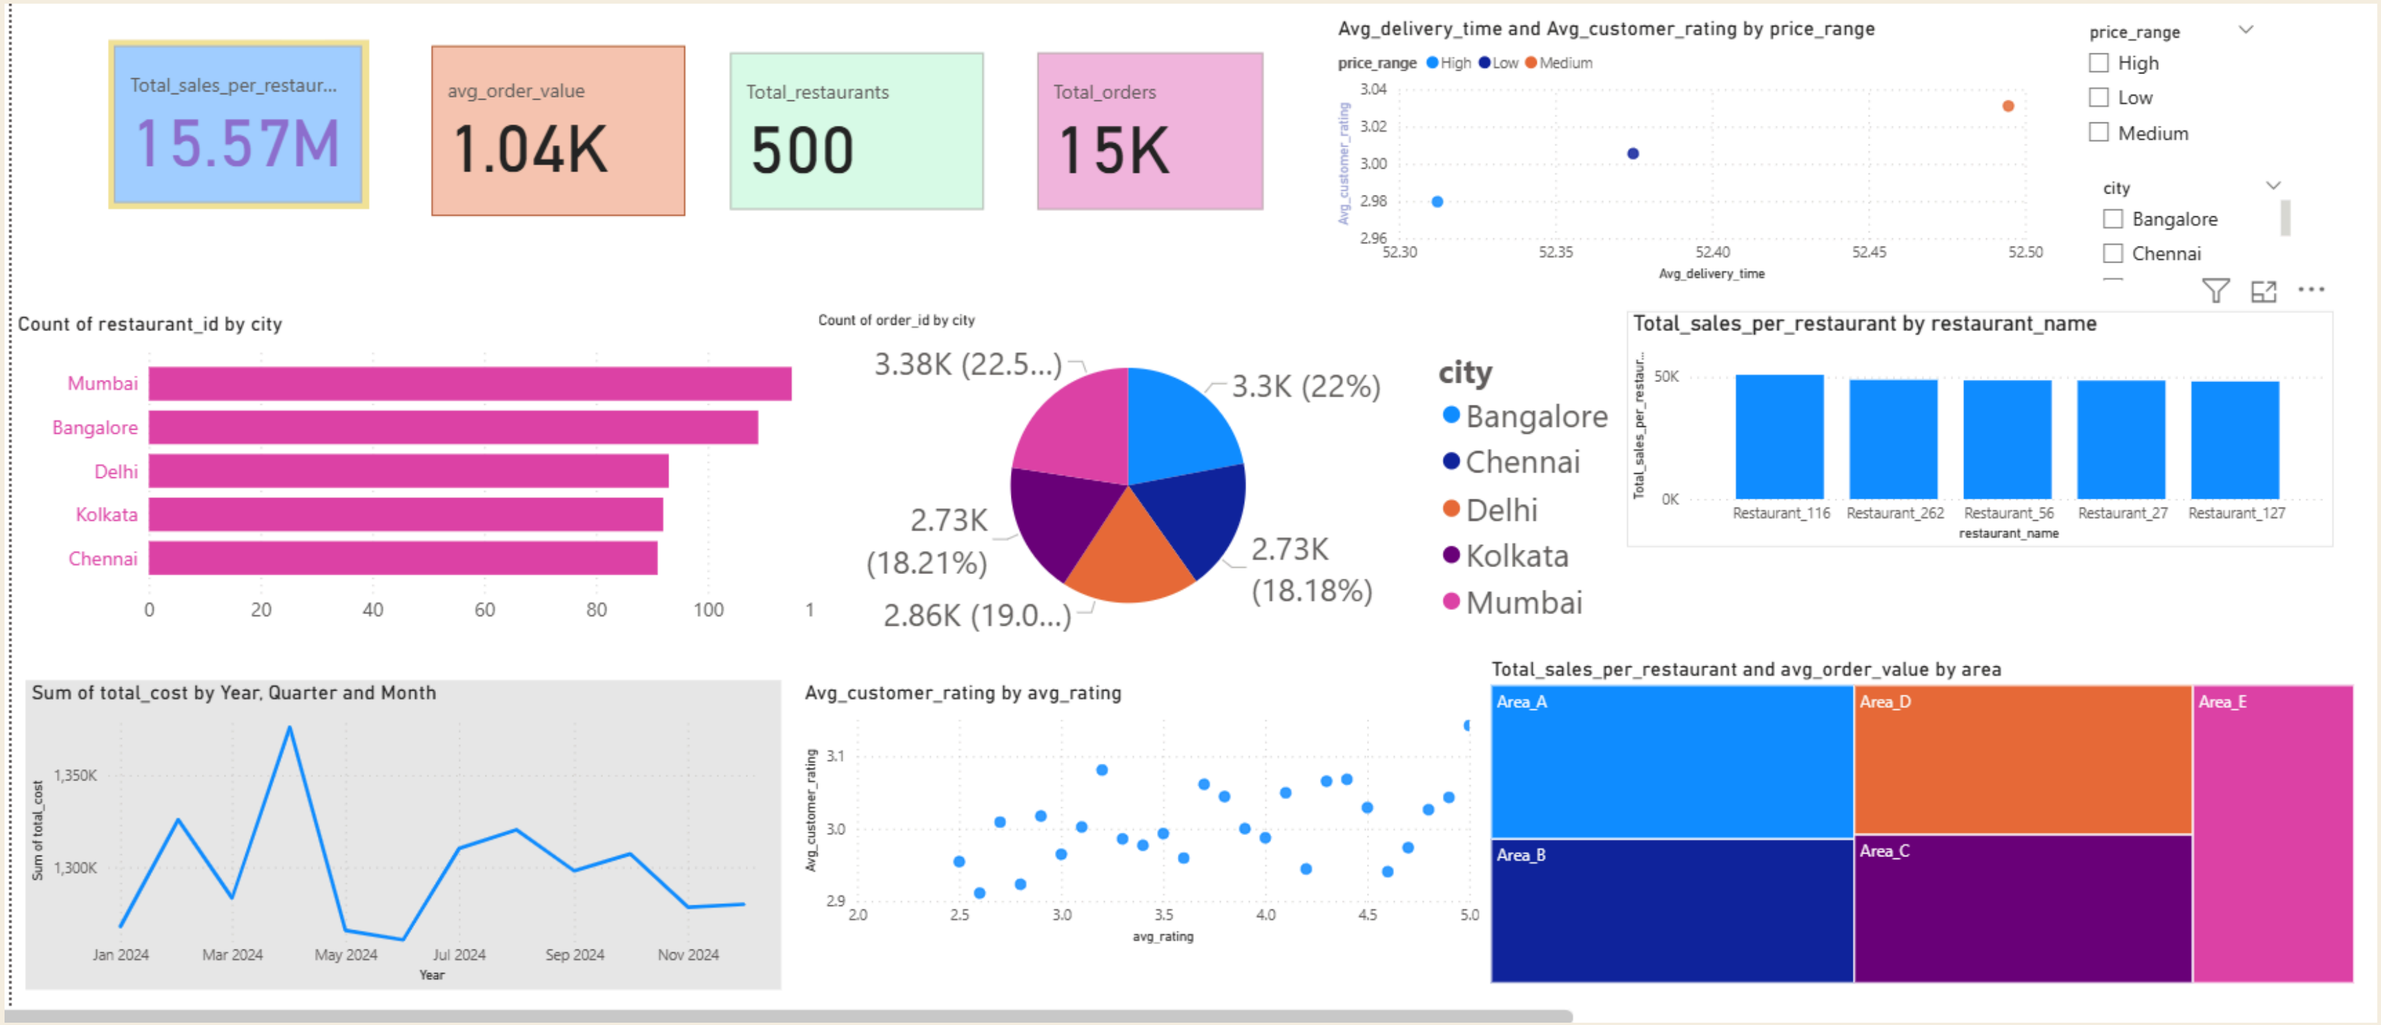
Area_A generates the highest revenue of ₹33,89,610 with an average order value of ₹1,034.68, making it the most valuable locality on the platform

Order Density by City Using a Heat Map

city	Total_orders	Total_restaurants
Mumbai	3384	115
Bangalore	3300	109
Delhi	2857	93
Kolkata	2732	92
Chennai	2727	91
Total	**15000**	**500**

Mumbai has the most orders and restaurants, and the ratio stays near 30 orders per restaurant in all cities.

Final Report



Recommendations

1. Focus marketing on Mumbai and Bangalore , which lead in both restaurants and orders.
2. Study what top restaurants do (higher order value, steady orders) and share these practices with low performers.
3. Look at the bottom 10 restaurants for ways to raise order value, for example through combos or add-ons.
4. Plan offers for the low months (January, May and June) to keep sales steady.
5. Investigate other causes of low ratings, since price and delivery time make little difference.

Thank You
